

Sutra.AI

AI-Assisted Startup Evaluation System

WHAT IT DOES

Evaluates startup submissions by ingesting a pitch deck, video transcript, code repository, and prototype URL. Extracts claims, retrieves evidence via vector search, validates each claim with LLM reasoning, and produces rubric-based scores grounded in source citations.

PIPELINE ARCHITECTURE

Ingestion

PDF/PPTX deck, video transcript,
website crawl, code repo

Embedding

HuggingFace MiniLM via LangChain for
semantic chunking

Retrieval

Qdrant in-memory vector store with
similarity search

LLM

Ollama + Llama3 locally — no external
API keys required

RUBRIC CRITERIA (Score 1-5 per criterion, with citations & confidence)

Problem Understanding

Technical Approach

Implementation Quality

Innovation

Communication

TECH STACK

Python 3.10+ · Ollama / Llama3 · LangChain · Qdrant · HuggingFace MiniLM · pypdf · Whisper

OUTPUT

JSON · Claim validation · Scores · Citations ·
Confidence
